

# buildasearch

## API Guide

BuildaSearch V.2.0.1 is an updated service that provides RESTful access to custom search results.

### Syntax for Data Reads (GET)

`http://bas.buildasearch.com/{name}?e={query}&key={api key}&format={type}&bascount={number}&bastart={number}`

Support for XML and JSON formats are provided in the order the service was requested. 10 results are returned per query by default.

Search Query Parameters	
name	search name
e	search query
key	api key
format	json   xml
bascount	display X results (10) default (20) max
bastart	starting point (0) default
